DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-14, and 16-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Publication 2002/0088615 to Dixon et al. in view of U. S. Patent No. 5,963,887 to Giorgio and JP405056178 to Fujisaka are references closest to the claimed invention. Dixon et al. in combination with Giorgio and Fujisaka disclose a multiple fan monitoring circuit for use with a plurality of fans, wherein each of said plurality of fans operates at a different frequency and generates a tach signal indicative of said fan operation that is output on a single fan sense node, wherein each of said tach signals is output concurrently with each of the other said tach signals on said single fan sense node, comprising: a plurality of waveform shaping networks, wherein each of said plurality of waveform shaping networks is coupled to a corresponding one of said plurality of fans and utilized to waveshape a tach signal generated by said corresponding fan; a plurality of fans; a frequency processing circuit, coupled to said plurality of waveform shaping networks, that concurrently receives said waveshaped tach signals at a single fan sense node, wherein said frequency processing circuit includes: a summing circuit, coupled to said fan sense node fan sense node, that combines said waveshaped tach signals into a single combined signal; and a frequency discriminator, coupled to said summing circuit, that separates said single combined signal into multiple components, wherein each of said multiple components corresponds to a particular fan in said plurality of fans. However, since claimed invention was filed on January 23, 2001, which is after November 29, 1999, and has been rejected in view of 35

Art Unit: 2857

U.S.C. § 102(e)/103 prior art, which was commonly owned or assigned at the time the invention was made (see M.P.E.P. § 706.02 (I)(1)) and the reference to the Dixon patent and to the assignment records for the claimed invention both were commonly owned by International Business Machines Corporation at the time the claimed invention was made; therefore, pursuant to 35 U.S.C. § 103(c), Dixon cannot preclude patentability under Section 103(a), and does not support the rejection of claims 1, 3-14 and 16-20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
